

July 13, 2023

The 5.7" Evervision Display (Part Number: 34-0037-01) used in the Production Module you purchase from us has reached the End of Life and the Last Time Buy has expired.

Reach Technology has incorporated the manufacturer's recommended replacement into a new display module assembly. The only difference, not noticeable to the eye, is a slightly narrower viewing angle of five degrees (60/70 Up/Down vs. 55/65 Up/Down). [See new panel specification.](#)
